Demystifying Accountability: Empowering Evaluation Strategies to Create Shared Responsibility for Student Achievement

Hyatt Regency Hotel

Pre-registration is required, \$35

Creating an accountability policy and processes for the diverse subgroups in your schools is often difficult and may be disconnected. This disconnect is known as the “policy and implementation gap.” In this clinic, you will not only study this gap, but will go one step further to develop short and long term evaluation strategies to measure effectiveness. Through evaluation processes you will understand how to develop your own comprehensive plan for student achievement to help meet requirements for all students under No Child Left Behind in your district. You will be given field-tested tools and a five-step framework to create a trusting environment for shared responsibility for student success.

Nicole Bowman, owner of Bowman Performance Consulting, is a UW-Madison Fellow specializing in Educational Leadership & Policy Analysis. Bowman is an Indigenous special interest group officer for the International American Educational Research Association. She is a registered scientific evaluator for the U.S. Dept. of Education’s Institute of Educational Sciences. Bowman’s company is an approved NCLB service provider.
